ACCESS PLATFORM TRAILER

INNOVATION. PRECISION. STRENGTH

Built From The Ground Up. The Rhino Access Platform Trailer.

THE ACCESS PLATFORM TRAILER

Based on our tried and tested Rhino plant trailers, the Access Platform Trailer has been specifically adapted for the transportation of scissor lifts and access platform machinery.

Working in collaboration with key players in the industry, we have developed a trailer that is as lightweight as possible, whilst still delivering on the Towmate Trailers strength and durability.

Designed to carry access platform equipment, the Rhino Access Platform Trailer comes with a specially designed pair of aluminium ramps, which are removable and stored on the side of the trailer using heavy duty fasteners whilst travelling. The trailer has grip deck rails, providing a stable base for the machine to be transported on, at the same time as removing the challenge of rotting floors by ensuring any dirt or water falls through the holes in the grip deck rather than collecting in the trailer. The trailer comes as standard with 48mm serrated propstands to support the trailer whilst loading, LED dual voltage lights and the heavy-duty running gear associated with all of our trailer ranges.

◀ SERRATED PROPSTANDS

To support the trailer whilst loading.

◀ ALUMINIUM GRIPDECK

Providing a stable base for the machine to be transported on.

ALUMINIUM RAMPS ▼

Removable and stored on the side of the trailer using heavy duty fasteners whilst travelling.
